-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 & 27-29, drawn to a method/machine readable medium for auditing transactions including encrypting the audit log and generating an integrity metric, classified in class 705, subclass 75.
- II. Claims 9-11 & 34-36, drawn to a method/machine readable medium for communications between a computing device and a separate entity, which includes hashing and storing data, classified in class 711, subclass 216.
- III. Claims 4-8 & 30-33, drawn to a method/machine readable medium for storing the transaction, the transaction including a monetary amount and a time of transaction, classified in class 718, subclass 101.
- IV. Claims 12-18, drawn to an apparatus comprising a control logic between the apparatus between a separate entity, classified in class 705, subclass 64.
- V. Claims 19-26, drawn to a system comprising an input/output logic, classified in class 700, subclass 25.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV & V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as auditing transactions including encrypting the audit log and generating an integrity metric. Invention II has separate utility such as communications between a

computing device and a separate entity, which includes hashing and storing data.

Invention III has separate utility such as storing the transaction, the transaction including a monetary amount and a time of transaction. Invention IV has separate utility such as a control logic between the apparatus between a separate entity. . Invention IV has separate utility such as an input/output logic. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
